“An Atypical? Clinical Trial as Pharmaceutical Marketing Tool”

When a young man committed suicide in an-sponsored clinical trial of antipsychotic drugs at the University of Minnesota in 2004, critics charged he had been coerced into study. may be right, but the ethical problem even larger. pharmaceutical companies are designing and analyzing clinical not produce reliable scientific data, but to ensure that their own drugs look to the competition. Trials are published in peer-reviewed scientific and distributed by drug reps as a way of marketing the. raises question: when is it ethically justified to human subjects in marketing?

This talk is part of a four-part series that features nationally experts cutting-edge issues in bioethics, their legal significance, and their impact various communities. The series is also-sponsored by the UCSF/UC Hastings on Law, Science, and Health and the UCSF Center for Health and.
