Phone: 415-476-0140

Monday, April 19, 2010
UC Hastings Lecture Series on Bioethics
Sponsored by The Lawrence M. Nagin ’65 Faculty Enrichment Fund

Private Assets, Public Mission:
The Moral Landscape of University Tech Transfer

David Winickoff, JD, MA
Assistant Professor of Bioethics and Society
Co-Director, Berkeley Science, Technology and Society Center
Since the passage of the Bayh-Dole Act in 1980, universities have had the right to own and license, with few restrictions, intellectual property arising from federally funded research. Since then, universities have become not only the locus of knowledge creation, but also agents of its commercialization. Public controversies concerning the management of academic intellectual property have raised serious questions about university commitments to research, teaching and public service. This talk will canvass some of these IP controversies and interpret their implications for the public mission of the modern research university.

This talk is part of a four-part series that features nationally acclaimed experts discussing cutting-edge issues in bioethics, their legal significance, and their impact on various communities. The series is also co-sponsored by the UCSF/UC Hastings Consortium on Law, Science, and Health Policy and the UCSF Center for Health and Community.

Time: Noon - 1:00 pm
Location: University of California, Hastings College of Law
200 McAllister Street, San Francisco (2 blocks from the Civic Center Muni/BART station) Alumni Reception Center (ARC, 2nd Floor)
